

EEWG Faithful Budget Talking Points:

- Fully fund the EPA. Cutting the EPA's budget would be deeply harmful to the climate, God's creation, and vulnerable communities. Specifically, please protect EPA's Climate, Air, and Energy research office, the Global Climate Change Research Program, the Environmental Justice office, funding for vulnerable communities to adapt to climate change like Alaska native villages, and regional programs like the Great Lakes Restoration Initiative and the Chesapeake Bay restoration funding.
- Protect and promote renewable energy, efficiency, and energy innovation funding.
- Protect the Arctic National Wildlife Refuge and do not include drilling provisions in the budget or appropriations process.
- Protect international climate finance in the budget, including but not limited to the Green Climate Fund and the Global Environment Facility.
