

Minute of the Indian Affairs Committee of New York Yearly Meeting

Approved 8-30-16; approved by Earthcare Working Group of NYYM 8-31-2016

Our two Committees strongly support the Standing Rock Sioux in their actions opposing construction of the Dakota Access Pipeline. This 1100-mile pipeline would create the same dangers as other projects, such as the XL Keystone Pipeline, and should be rejected for the same reasons. The proposal should properly have been subjected to the same thorough review prior to approval as the XL Pipeline, so that the Standing Rock Sioux could have their voices heard and their historic rights respected, including the right of access to clean water, the foundation of all life, and the protection of their burial sites and other sacred sites as the 1978 Native American Religious Freedom Act guarantees. This includes honoring and respecting the promises of the United States to the Great Sioux Nation in the 1851, 1859 and 1868 Treaties of Fort Laramie which this project would violate.

All the others affected by the project are also entitled to be heard. Anything less, particularly for a project of this scope, is a failure of the democratic process and is a lack of transparency. It is a deliberate avoidance of the environmental review process and undermines the laws intended to ensure that all environmental effects are considered and properly weighed before approving an undertaking of this magnitude.

As Friends, we bear witness to the equality and to the sacred nature of every person, since every person carries the same Spark of Divine Light. The principle of equality is also a fundamental principle of a democratic society. When we shut out voices and ignore the rights of the people of Native Nations within the U.S., we deny that principle.

Friends also have had a particular concern for the relations between the European settlers on this continent and its First Nations, beginning with our founder George Fox's encounters with Native inhabitants during his North American travels in the 1680s and the founding of Pennsylvania. New York Yearly Meeting has had a standing Indian Affairs Committee since the 1790s and maintains warm relations with Native Nations and Peoples of this region up to this day. Thus we stand beside our First Nation brothers and sisters in insisting that the legal and treaty rights of the Standing Rock Sioux must be honored and must not be violated by the construction of this pipeline. Too often, Native Nations have paid the price for projects intended to benefit American society by actions that violate treaties and Native rights, such as taking land or constructing dams.

As Friends, we also hold sacred our responsibility, the responsibility of all humanity, to care for the Earth, our home, and preserve it for the future generations of humans and of all life. Our Native sisters and brothers have long led the way in showing the importance of taking into consideration not only our own desires, but also the needs of the future generations, before we act. Projects such as the Dakota Access Pipeline imperil the waters of the earth, vital to the Standing Rock Sioux and to all life. Pursuing the use of fossil fuel rather than finding renewable and sustainable alternatives imperils the atmosphere, the air we breathe and the climate necessary for the continued existence of humanity and of the many forms of life that we know and claim to cherish. We must move quickly to implement environmentally sound practices to preserve our Earth-home and all life on it.
